Skills

Ruby, Rails, JavaScript, Python, React, Redux, Node.js, Express.js, Mongoose, MongoDB, SQL, SQLite3, PostgreSQL, webpack, jQuery, Git, Heroku, Canvas API, CSS, HTML,

Projects

Fullstack

[live site](#) | [github](#)

Ruby on rails, PostgreSQL, JavaScript (ES6), React, Redux, HTML, CSS

Clone of [Substack](#)

- Full stack application built with Ruby on rails for the backend
- Frontend built with Javascript and React
- Used Redux to maintain state, keep a user logged in, and manage the user interface

Landmarked

[live site](#) | [github](#)

Node JS, JavaScript, Express, Mongoose, React, Redux, Ruby on Rails, PostgreSQL, CSS3, HTML, AWS, Heroku

Travel Journal that allows users to create entries and trips and features an interactive map

- Harnessed the unidirectional state management of Redux to simplify React components and directly manage data for form inputs and form submissions
- Stylized the page using CSS and React to make it professional and presentable
- Used the Google Maps API to render a map and place markers for custom entries

Experience
